**TO THE CHAIRMAN AND MEMBERS OF THE
NEATH RURAL DISTRICT COUNCIL**

Mr. Chairman, Mrs. Hopkins and Gentlemen,

This is the annual report of the Medical Officer of Health for the year ending 31st December, 1964. This period was the final year in office of your previous Medical Officer of Health, Dr. H. R. Stubbins. I trust that I will be able to continue the work which he had done so well, and serve the council and the district with the same distinction.

The vital statistics show no great changes from previous years, but when compared with the rest of Glamorgan or with England and Wales some of the statistics are a little disappointing. I refer in particular to the infant mortality and perinatal mortality rates. These have been regarded as indices of social conditions or living standards. These figures deteriorate as comparisons are made between S.E. England and areas to the North and West of the country. The same rule can be applied roughly to Glamorgan, i.e. the deterioration continues in a North Westward direction for Cardiff. Many factors are involved in this, e.g. employment, wages, education, climate, race, diet, customs, social and medical services, and housing, amongst others. Of these, the ones that the District Council are most intimately concerned with are the service given by the public health department in promoting health amongst the population and the provision of a satisfactory number of good houses together with the removal of those that are unfit. Useful study of these two statistics was continued by the Maternity Liaison Committee.

The bulk of the deaths were caused by cancer, strokes, heart and circulatory disease—328 out of the total of 489. Many of the deaths were due to chronic degenerative conditions. Some were preventable by not smoking. Of the 67 cancer deaths 5 were due to cancer of the uterus or womb. This is less than 1 per cent of the total deaths. Cancer of the cervix, or the neck of the uterus, is often predictable by means of cervical cytology—the “smear test.” Provision for this test is on a minimal scale in Neath at present, chiefly owing to a shortage of trained staff.

New legislation which came into force in 1964 included the Offices, Shops and Railway Premises Act. One hundred and seventy-four premises employing 819 persons were registered during the year. This means additional work for the Public Health Inspectors and the Health Department in general, as the Act is concerned with the health, welfare and safety of employees.

During the year a number of complaints were received of a very unpleasant smell near the tidal River Neath. These were investigated without success.

I am

Yours faithfully

A. G. ALEXANDER

Medical Officer of Health.

1962	484	11.81
1963	497	12.17
1964	489	11.98

During the year the District Coroner held inquests on 14 deaths, i.e. 2.8 per cent of the total deaths.

Transferable Deaths.—One hundred and sixty-two deaths occurred outside the district, i.e., being persons belonging to this district (104 of these occurred in the Neath General Hospital). These deaths are included in the total number of deaths 489 given above. Fourteen deaths occurred within the district among persons belonging to other districts and these have been transferred to the districts concerned and are not included in the total number of deaths for the area.

Seasonable Death-rate.—The following table gives the number of deaths and death-rates for each quarter of 1964.

	No. of Deaths	Death-rate
First Quarter	140	13.72
Second Quarter	120	11.76
Third Quarter	96	9.40

Infantile Mortality

For the purpose of calculating Infantile Mortality there were 651 births during the year and 15 deaths of infants under One Year, giving an infantile mortality rate of 23.04 per thousand live births.

The infantile mortality rates for legitimate and illegitimate infants were 23.77 and 0.00 respectively.

The following table gives the number of births and deaths of infants under One Year, together with its corresponding infant mortality rate, for each year since 1955.

Year					Births	Deaths under one year	Rate per 1,000 births
1955	566	23	40

Approximately 94% of the houses in the area have a water carriage system to sewer. A scheme for the sewerage of 58 houses in the Tyllwyd-Dyffryn Church-Primrose Bank area of Bryncoch was under construction in 1964. The remainder of the properties in the area are in the main physically and/or economically incapable of being connected to a sewerage system. In the southern part of the area, i.e., the Parishes of Coedffranc, Dyffryn Clydach, Blaenhonddan and Tonna, sewerage is discharged into the tidal River Neath. At Jersey Marine, sewerage from Baldwins Crescent and Elba Crescent is still discharged onto the beach, an unsatisfactory arrangement which needs to be remedied. In the remainder of the area sewerage is discharged into treatment works and the treated effluent enters the Rivers Neath and Dulais.

(c) Prevention of Damage by Pests Act, 1949

During the year ended December 31st, 1964, the following numbers of separate premises were inspected:

Local Authority Properties	10
Dwelling Houses	1,760
All Other Premises	153
Total	1,923

A total of 5,048 visits and re-visits were made to the above mentioned premises.

During the course of these inspections the following infestations were discovered:

Type of Premises	Minor Infestations
Refuse Tips	10
Dwelling Houses	442
All Other Premises	47
Total	499

During the same period, treatments and re-treatments of infested premises were carried out by the local authority as follows:

Refuse Tips	20
Dwelling Houses	653
All Other Premises	87
Total	760

Maintenance treatments of sewers were also carried out during the year.

(d) Schools

All schools in the area are provided with a piped water supply and a water-carriage system of sewerage.
